Municipal Elections Next Monday.

Eight Candidates for School Trustees and Four For Councillors

The Didsbury electors will have eight candidates to choose from for the office of school trustees on Monday next.

The following have been nominated: C. Adshead, J. A. McGhee, Dr. Evans, Dr. Clarke, H. Hawkes, J. V. Berscht, N. S. Clarke, W. S. Durrer.

Messrs. C. Adshead, McGhee, Durrer, and Dr. Evans were members of the late board.

The fact that the whole board of trustees resigned gives the ratepayers the opportunity to select a board that they have full confidence in and there should be a record vote polled.

Two trustees will be elected for a term of two years and three for a term of one year. The two receiving the highest number of votes will be elected for the two year term.

There are four candidates for the town council to fill three vacancies. The candidates are: Dr. J. L. Clarke, A. C. Fisher, W. T. Pitt, and H. M. Reiber.

The election will be held at the office of the secretary-treasurer, from the hours of ten o'clock in the morning to seven o'clock in the evening.

The Excelsior Glee Club of Calgary, under the leadership of Glyndwr Jones, L.R.A.M., is engaged to give a concert in Didsbury on March 6th. Keep the date open as we are assured the entertainment will be one of the best ever heard in Didsbury.

CARD OF THANKS

I wish to extend my sincere thanks to the many neighbors and friends for their many deeds of kindness and sympathy shown during my recent sad bereavement.

JOE JONES, Westward Ho.

LOCAL & GENERAL

Mr. J. W. Phillipson was a visitor to Calgary last Friday.

Mr. Geo. Burns was a business visitor to the southern city on Tuesday.

Mrs. George Burns and Mrs. James Burns left on Tuesday for California to visit with friends.

Mrs. W. J. McCoy is visiting with friends at Calgary and Field, B.C., this week.

Three local rinks are attending the Olds bonspiel this week. Kauffman, Fisher and Dr. Clarke are the skips.

Mr. Walter Simons, who has been visiting in Didsbury, left on Tuesday for his home in Portland, Ore.

Ronald Colman and Lily Damita in "The Rescue," at the Opera House, on Friday and Saturday, Feb. 14 and 15.

Miss Lola Hunsperger who is attending the Garbutt business college in Calgary, spent the week end at her home in town.

The annual meeting of the Knox United Church will be held on Tuesday, Feb. 18. A short business meeting will be followed by a social.

Owing to the mild weather on Monday, the hockey game between Carstairs and Didsbury had to be postponed until Monday of next week.

Mr. and Mrs. Abe Snyder and daughter left last Thursday for California, where they will spent the balance of the winter.

Rev. W. W. Krueger, P.E., will be at the Ev. Church here on Wednesday evening, Feb. 19, for a quarterly conference business meeting.

Miss Dorothy Cipperley is spending a couple weeks vacation at her home east of town. Miss Winnie Spragg is taking her position at the hospital during her absence.

The funeral of Earl "Lefty" Guertin, of Crossfield, was held in Calgary on Tuesday. The deceased was well known in this district as Crossfield's star pitcher of last season.

The funeral of Earl "Lefty" Guertin, of Crossfield, was held in Calgary on Tuesday. The deceased was well known in this district as Crossfield's star pitcher of last season.

"Talkie" Machines Arrive in Didsbury.

Mr. W. H. Sharpe, who went to Chicago a couple of weeks ago was apparently successful in obtaining the "talkie" machine, as two portable machines arrived in Didsbury this morning's train.

At the time of going press Mr. Sharpe has not arrived home but he will undoubtedly have a statement to make next week.

Greenfield Defends Wheat Pool.

A striking defence of the policy of the Canadian wheat pool in the orderly marketing of the crop was made yesterday at a luncheon of the Canadian Chamber of Commerce in London by Herbert Greenfield, former premier of Alberta.

"No more striking illustration of the value of expert collective marketing has been given," he said, "than that of the Canadian wheat pool this year. Had it not been for the pool the Canadian crop would have been sacrificed early in the year at bargain prices."

"The Canadian policy has been to sell at such a price as will give a fair return to the grower. The Argentine has marketed her crop at a price that would have given practically no profit to the Canadian grower and would have decreased the buying power of the Canadian farmers by \$2000,000,000."

Mr. Greenfield took occasion to deny what he described as misleading and mischievous statement made in England about the wheat pool.

There will be a U.F.A. dance in the Lone Pine Hall on Friday, Feb. 14, Bellamy's orchestra.

Mr. J. Shiels had the misfortune to break her wrist whilst curling on Tuesday. She slipped and fell on the ice just after she had delivered her rock.

Mrs. (Rev.) H. E. Roppel has returned home after spending last week-end at Warner, Alta, where she supplied the pulpit on Sunday in the Evangelical church there. The minister there who has been on the sick list for some time seems to be improving at present but his wife had the misfortune last Saturday to break her arm by a fall on an icy door step. The many friends here who know Rev. and Mrs. Hauch will regret to hear of their sickness and ill fortune.

BIRTHS

Born, on Feb. 5th, to Mr. and Mrs. W. Coates, a son.

Born, on Feb. 7, to Mr. and Mrs. H. Rennie, a son.

C.P.R. Will Spend Fifty Million Dollars.

More than \$50,000,000 will be expended on new equipment, new branch line construction and improvement to existing equipment and roadbed by the Canadian Pacific Railway during 1930, according to an announcement made on Tuesday by E. W. Beatty, chairman and president of the Canadian Pacific Railway.

"Firm conviction that Canada will continue its steady and untroubled progress during the present year the directors approved of the impressive program of improvements and extensions," said Mr. Beatty when emphasizing that the scope of program would include practically every phase of the company's activities. The average actually prepared for Western crop this year, development in the mining field, and other directions, he felt more than justified this vast expenditure and at the same time stimulate Canadian industry and provide employment for many thousands of Canadian workmen.

Along with the construction of other branch lines it is planned to start work on a branch line to run north-westerly from Crossfield to a distance of 80 miles to connect the present line of the Lacombe and North-Western with Calgary-Edmonton line. The grading will be carried on during the present year.

Aberdeen-Angus Sale at Lacombe.

The Aberdeen-Angus Breeders' Association will hold their first annual sale of pure-bred breeding cattle at the Exhibition Grounds, Lacombe, on Wednesday, Feb. 26. The offering consists of 10 head of females and one outstanding herd sire consigned by some of the leading breeders of Aberdeen Angus cattle in Alberta. The entire offering consists of young, well bred cattle of popular blood lines and should attract the attention of breeders of Aberdeen-Angus cattle and prospective buyers from a wide territory.

SPRING IS COMING

Every person according to his age and inclination is beginning to get the usual signs which tell him spring is coming. The gardener is toasting his toes and feasting his soul on his brand new seed catalogues. The naturalist has caught the flash of a robin. The teacher is sure because the children are growing twister. Father realizes it because the light bills are beginning to drop and mother knows spring had better come because the winter flannelets are beginning to wear mighty thin.

Didsbury Wins Over Calgary Tigers.

The largest crowd of the season witnessed the hockey game between Didsbury and the Calgary Tigers at the local rink on Thursday last.

The game was not as fast as it might have been on account of the heavy ice.

Cecil Studer secured the first goal for the locals on an individual play and Ralph Johnson, of the Tigers, tied the score with a shot from the locals blue line. The balance of the goals were Didsbury's and were scored on combination plays by two players: Hugot to Cook; Cook to Johnson; and Johnson to Robinson. Final score, 4-1.

J. S. McCoy, the referee, handed out numerous minor penalties.

Line up:—

Didsbury: McCoy, Moyle, Studer, Cook, Robinson, Johnson, Hugot, Berscht, Crossweller.

Calgary Tigers: Kay, Knaggs, Rube Johnson, Dunlop, Rothwell, Ramsay, Scott, Ralph Johnson.

Motorist Must Secure License.

It is now over six weeks since the motor license for 1930 were due and there are a great many autos still carrying the wrong colored license plates.

The provincial police have been instructed to make a check up on licenses. Constable Dobbins says he prefers to warn the car owner to get a new license, but before many days he will be compelled to bring in the offenders. So get a new license and be on the safe side.

ALBERTA MOUTH HEALTH CAMPAIGN

An educational campaign to teach better habits of living, more reasonable diet, better care of the teeth, and more thorough mouth hygiene and mechanical cleansing, is to be carried on for the next sixty days in Alberta. This great Health Campaign, possibly the greatest co-operative health measure which has ever been undertaken in Canada, will give every man, woman and child in the province the opportunity of learning these very essential facts about the care of the teeth.

It is the Canadian Dental Hygiene Council, a nation-wide organization, which is undertaking the campaign in Alberta, and it has received the most spontaneous assistance from the Departments of Health and Education. Every dentist in Alberta who is a member of the Association will put in two days of his time without charge in connection with the campaign.

Preventive dentistry is the gospel which these men and women will carry throughout the country. The boys and girls of today are the men and women of tomorrow, and they will be healthier, happier, more efficient to carry on if they have learned early in their lives the proper method of care of their teeth and gums and mouths.

Satisfactory Service

For more than twenty-three years United Grain Growers has been giving satisfactory service to thousands of farmers who do business with it.

That is the reason why farmers throughout Western Canada have high regard for this Company.

Immigration and Unemployment

At the present time much is being said and written on the twin subjects of immigration and unemployment. Hardly an issue of a daily paper appears that does not contain some reference to the problems involved, hundreds of letters to editors are penned expressing one view or another, conferences and conventions pass resolutions, and Governments, Federal, Provincial and Municipal are struggling with the difficulties confronting them. There is in all quarters a tendency manifested to shelve the responsibility on to the other fellow, to, in the descriptive language of the day, "pass the buck," and "let George do it."

Within recent weeks headlines in the press have informed a reading public that "3,000,000 are unemployed in the United States," that in Germany "2,000,000 are out of work," that the number of unemployed in Great Britain "remains between 1,500,000 and 2,000,000," while, coming nearer home, that "the unemployed situation is acute in all large Canadian centres of population."

What is the cause? What is the solution? The United States has been experiencing a period of unexampled industrial growth and activity. In 1929 Canada enjoyed the most prosperous year in its history, with all records for manufacturing, building construction, and development of natural resources reaching new high marks. Despite depression in certain basic industries, Great Britain reports more people at work than before the war, while Germany, we are told, is "coming back," and regaining much of her former strength in the export markets of the world.

In Canada the opinion prevails in many quarters that our unemployment problem is largely due to an influx of immigrants, but such a cause cannot be advanced in the case of Great Britain, Germany, or even in the United States, with its rigidly restricted immigration quotas. Yet unemployment seems to be almost universal; in fact, there is less in proportion to population in Canada than in other countries. So, the cause lies deeper than in immigration, although, of course, it undoubtedly has some effect.

In the United States it is not partly accounted for by the fact that for some years past mass production has been maintained on a scale hitherto unknown, and the marketing of this enormous production has only been possible through the sale of every conceivable kind of article on the installment plan, until the average income of the buying public was tied up in advance for long periods. Possibly the saturation point has been reached, and people being unable to buy more, even on a credit basis, production had to slow up.

Is it not also true that the enormous sums now invested in automobiles, radios, and other expensive but, in the case of the average citizen, unproductive devices, being thus withdrawn from productive enterprises is having its effect on other industries?

Again, through the inventive genius of this age, labor-saving machinery and appliances of all kinds have had the result of enabling one man or woman to do the work of two, three or more, with a consequent lessening of the ratio of employment to volume of output. Wages to those employed are higher, but the number of workers actually required in many industries is less, although their output is greater. Here in Western Canada we have an example of this in the big drop in the number of farm helpers required through the introduction of the combined harvester-thresher and the increasing use of motor trucks over horse drawn vehicles. As one result, too, the tendency is again in the direction of larger farms, whereas not many years ago the belief was fairly general that the day of smaller farm holdings providing for more families on the land was approaching.

What governments, economists, manufacturers, labor unions, and our whole citizenship must realize is that a present paradox of unemployment in an era of general expansion and growth is the result of changing world conditions. All countries are affected. Everything is in a state of flux. And because all countries are affected, and also because far away fields always look green, people everywhere are looking elsewhere to better their condition. The inevitable result is that all countries will more and more restrict immigration as a measure of their own national salvation.

What will happen then? There is only one answer: People will have to adjust themselves to changed, and still rapidly changing conditions. They will have to work out their salvation at home. The problem is a huge and difficult one. Nobody yet has the solution. All must think and study, and that is the sole reason for this article—to encourage real study of the problem, instead of the present prevailing tendency to lay the blame on somebody else.

Says Insanity Increasing

Eminent Psychologist Makes Some-
what Startling Assertion

After copious consideration and profound contemplation an eminent psychologist asserts that it is only a matter of time when we will all be in the asylum. He finds that insanity is increasing rapidly, that a few cent-

ies hence practically the whole world will be daffy in the bean. In a universe of nuts a squirrel may be king.

The fact that the world is going crazy is no surprise to some folks. They think that it is that way already. But on the other hand there are some of good repute who are still able to figure out that this is not such a rotten world after all, and that there is enough skill and intelligence available to keep the machinery running for an indefinite period. —Los Angeles Times.

Unemployment Relief

Regina City Council Projecting Civic
Works During Winter Season

At an actual cost of \$20,000, another sewer programme is now being considered by Regina City officials as an unemployment relief measure, and will supplant the programme already undertaken and nearly completed.

To date this winter, eight and a half blocks of sewers have been dug by day labor in various sections of the city as unemployed relief. As well, a plank walk programme of 18 blocks has recently been started for unemployment relief at a cost of \$5,000.

W. N. U. 1821

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within. The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Good Word For Women Drivers

New York Commissioner Says More
Men Break Traffic Laws

Commissioner of Motor Vehicles, Charles A. Hartnett, states that women drivers in New York State represent 16 per cent. of the total number. In the last four months 27,130 men violated traffic laws—as against 653 women.

On an average day 250 men are arraigned and only four women.

Over this four-month period 3,018 men were up for speeding, as opposed to sixty-six women.

Difficulties over car lights have brought 4,635 men to court, while only sixty-nine women were charged with similar offenses.

Smoking motors were charged against seventeen men, but against not one woman.

One woman was very legibly booked for intoxication. To offset that showing there were 132 men accused of driving while drunk.

Thirty women failed to keep to the right, 4,075 men did likewise.

Seven women mistook a one-way street. There were 481 men who made the same error.

Thirty-two women did not have their licenses at a crucial moment. Similar lapses of memory affected 1,226 males.

INFLUENZA'S VICTIMS

Left Weak, Miserable and a Prey
To Disease In Many Forms

One of the most treacherous diseases afflicting the people of Canada during the winter months is influenza. It almost invariably ends with a complication of troubles. Its victims suffer with alternate fevers and chills, headaches and backaches. It leaves them an easy prey to bronchitis and pneumonia. Indeed, the deadly after-effects of influenza may leave the victim a chronic invalid. You can avoid influenza entirely by keeping the blood rich and red by the use of Dr. Williams' Pink Pills. If you have not done this and the disease attacks you, you can banish its deadly after effects through the use of this great blood-building nerve-restoring tonic.

Here is proof of the power of Dr. Williams' Pink Pills over this trouble. Mr. F. H. McMullen, Belleville, Ont., says:—"Some years ago, following a severe attack of influenza, I was left in such a weak condition that my friends thought I would not get better. I developed nervous indigestion, and my blood got thin and watery. In this weakened condition I began the use of Dr. Williams' Pink Pills, and these did what other medicine had failed to do—brought me back to health and strength. I can honestly say I think them the best blood builder and nerve tonic known, and I shall always praise them."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Pay \$20,000,000 In Cash

The growing prosperity of Canada is indicated in the official announcement that the Canadian Government will redeem in cash a loan of \$20,000,000 payable on February 1, 1930. The revenue of Canada was greater in the first ten days of the current fiscal year than the total for the whole of the year 1868, the first year of Confederation. The surplus of revenues over expenditures last year would have more than paid off the national debt of Canada as it stood in the early years of this century.

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

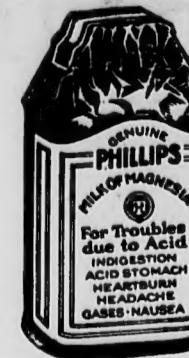

Real Service

If a shower comes up in the city of Berlin, the pedestrians will find on the next corner an automatic machine for the vending of umbrellas. Drop 15 cents in the slot and walk off with a brand-new storm shelter. The umbrellas are made of oiled paper and may not last a lifetime, but they are good for a dozen or more storms, and are right handy when the drops are dropping.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

When it comes to wheat, says the Toronto Globe, Canada is sure of her ground.

That Sore Throat Needs Minard's.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

To Extend News Service

Movement To Enlarge Newspaper Service In Western Canada

Newspaper publishers and editors of western Canada, members of the Canadian Press, met at Vancouver recently, in preparation for the great extension of the news service in western Canada following the printerization of the leased wire telegraph circuits now in progress from Winnipeg to Victoria, which will about double the wordage laid down in the individual newspaper offices and will permit scope for much freer interchange of news as between the four western provinces, as well as the publication of more eastern Canadian news in the west and more western Canadian news in the east.

Proposals of the management for the betterment of the news service, both foreign and domestic, were endorsed and in particular the meeting went on record as recommending to the board of directors of the Canadian Press the early establishment at Tokio of a Canadian Press staff representative, now that a Canadian ministry has been established in Japan.

B.C. Lumbering Operations

Four hundred plants are engaged in manufacturing lumber products in British Columbia, involving an investment of 200 million dollars. In 1928, the cut was over three billion feet. These plants employ forty thousand people and pay out in wages sixty million dollars annually.

The strong no less than the weak must bear the penalty of their own natures. The man or woman who has learned to stand alone must not complain if left to stand alone much of the time.

Tribute To Canadian Industry

Canada Has "Cleanest" Tea Warehouse In The World

On a tour of the Dominion, under the auspices of the British Institute of Certified Grocers, six post graduates visited the Montreal plant of the Salada Tea Company, of Canada, Limited. The following report made by the secretary, Mr. C. L. T. Beeching, appeared in the Tea & Coffee Trade Journal, of New York.

"During the tour they (the graduates), inspected some of the wholesale and retail tea concerns in the Dominion, and they considered that the Montreal plant of the Salada Tea Company was the neatest and cleanest tea blending warehouse and packing centre in the world."

Canada has reason to be proud of industries that can make such an impression on visitors of this calibre.

Falling Hair—Just try Minard's.

There are 21 million telephones in the United States which can be connected to seven million in Europe for conversation, using radio telephony across Atlantic.

Churchill Now Experiencing Its Last Lone Winter Before Advent of New Era Next Spring

Churchill is in the chill midst of its last lone winter. Except for some 20 men—and a single woman—every resident at the Government owned Bay port has moved out to the south. The last scheduled Muskeg Limited puffed down to The Pas in early December and now the mail is "mushed in" twice a month by dog team from Gillam, at Mile 327.

Ice-locked, the 250-year-old harbor is deserted until next spring.

A skeleton force at Churchill is retained by the Hudson Bay Railway which completed the first laying of steel to the harbor 511 miles northeast of The Pas last March, and by the Department of Railways and Canals. But all railway construction and dock labor is at an end for several months. Three men remain at the government radio post, and one at the telegraph office; the Hudson's Bay Company trading post continues its work; and Rev. H. A. Gibson and his wife reside at the Anglican Mission.

Otherwise the settlement at the mouth of the Churchill River, where 1,500 men toiled last summer, is abandoned to the chill winds lashing down from the sea.

In all probability, however, the Bay port of the West will never know another so lifeless stretch between autumn and spring. It is certain that the opening of the settlement to the public, planned for next spring, will mark the beginning of a record of at least partially permanent residence at Churchill. Undoubtedly, ingress to the end of the Hudson Bay Railway steel will be closely scanned by the Dominion Government; but a new town will begin to take form when the way is opened to prospective settlers.

The fact that harbor construction work is not expected to reach completion until sometime in 1931 will not prevent a hurried surge of new citizens to Churchill. As yet, under government ruling, three banking establishments alone have marked the arrival of commerce; numerous applications, however, for permission to set up establishments which might flourish on the trade of hundreds of residents busy at the harbor, have been received.

Divers considerations, no doubt, have influenced the government in the decision to supervise closely the settlement's early civic development. Housing accommodation at present is sufficient only for those busied at railway and harbor work; and, under existing conditions, water supply and sewage problems yield to but temporary solution. When Churchill assumes the status of a town, it is expected that these difficulties will have been solved.

As a harbor, nevertheless, Churchill has not been slighted by nature. Before it empties into the Bay, Churchill River swells in the shape of an oval bottle with its neck to the sea—a ready-made port. Besides, projecting headland and an island shelter the opening so that storms have little effect on the inner harbor, enclosed as it is by rocky cliffs which rise in some cases to a height of 70 feet.

Along one side of the Churchill River runs the Hudson Bay Railway, reaching almost to the tip of a narrow point projecting out into the bay. It is at the base of this point formed of rugged rock ridged by

the years, that the townsite, no doubt, will be located; and it is on this side of the river that the government is constructing its harbor works.

According to the report of Frederick Palmer, British engineer retained by the Dominion Government in 1927, to advise regarding the suitability of Nelson and Churchill as harbors, the harbor capacity can be easily increased by a little dredging to accommodate as many and as large vessels as ever will be likely to plan entrance to the port.

In the West, Churchill is looked on as a new port, but in reality its history goes back into the distant past of early Canadians. Munk, the Danish explorer, is believed to have wintered at Churchill in 1619, more than three centuries ago. Trading vessels of the Hudson's Bay Company sailed into the Bay more than 250 years ago, and utilized Churchill as a haven soon after their early voyages.

Even Fort Prince of Wales, a mass of ruins across the river from the modern tangle of incipient dock construction, is not "old" as the history of Churchill goes. It was almost two centuries ago, during the years from 1733 to 1744, that the Hudson's Bay Company built the huge stone fort at the mouth of the Churchill River.

But 25 years before the completion of Fort Prince of Wales, the company had constructed Fort Churchill. Erection of the original stronghold came after the Treaty of Utrecht, in 1713, established Britain's claim to the Bay country, but fears of the French raids had persisted long after the incursions of d'Iberville, late in the 17th century, temporarily robbed the Hudson's Bay Company of almost all its posts.

Even if Churchill rises to prominence as a Canadian port for Western trade, it cannot lose its place of historic significance in Canadian annals. Even when imports rush in through the Bay to the mouth of the Churchill River; even when prairie wheat surges along the Hudson Bay line and outward to Britain and Europe during the harbor's ice-free period, the gaunt ruins of Fort Prince of Wales, and of the old harbor battery at the tip of the point across the river will remain among the Dominion's history marking sites.

Horses Were Poisoned

Water From Abandoned Wells Was Responsible For Loss Of Animals

In Southern Saskatchewan

That a poison of which seven drops killed a 1,400-pound horse in three days is produced by bacteria in old wells in Saskatchewan, has been discovered by Dr. J. S. Fulton, professor of animal diseases at the University of Saskatchewan. In one district 30 miles square, from 75 to 100 horses have been lost this winter. On one farm 8 out 14 horses died. Losses have been commonest in the south and west of the province. Attention was paid to the water supply where outbreaks occurred and it was found that in each case old wells had been used owing to the particularly dry season. Although the wells contained water which appeared fresh, bacteriological examination showed the presence of virulent strains of botulinum in three out of four wells.

The bacteria isolated from these waters when grown in the laboratory, reports Dr. Fulton, produced a poison of which seven drops killed a 1,400-pound horse in three days.

Small quantities of the water itself when fed to experimental animals, caused death in a few days.

Much Ado About Nothing

"For 10 years, 10 long and lean years," cried the writer, "I have been composing this drama, changing a word here, a line there, working on it until my fingers were cramped and aching, my brain and body weary from the toil."

"Too bad, too bad," the producer murmured sympathetically. "All work and no play."

Color blindness is sometimes called Daltonism, after John Dalton, English scientist, who discovered this abnormal condition.

ROBERT L. BURNAP

Announcement has been made at Canadian National headquarters of the appointment of Robert L. Burnap, as Vice-President in Charge of Traffic, with headquarters at Montreal, vice A. T. Weldon, the appointment being effective at once.

R. L. Burnap has been associated with the various lines which now comprise the Canadian National Railway System during the whole of his railroad career of 36 years.

Champion Back At Work

The Prize Hen Of Saskatchewan University Keeps Up Record

Lady Victorine, the world's champion hen, is back at work. After completing her year's record of 358 eggs, she laid 16 more eggs before commencing to moult on September 27 last. Saskatoon thermometers are recording such temperatures as 42 below zero, but this Barred Rock lady, who lives in an unheated house at the University of Saskatchewan, started in last week and is again laying her daily egg.

Professor Baker commented on the size of the eggs this hen is producing. After one small preliminary egg as a try-out, the seven eggs produced during the past eight days have averaged five grams each over the standard egg weight.

A request was received from the committee of the Madison Square Garden Poultry Show, at New York, for the loan of the hen as a special exhibit. It was decided however, that it was undesirable to send the hen to the show as the university wish to obtain as many chicks as possible from such desirable breeding stock.

Hydro Development In West

With four large undertakings at present under construction, which will ultimately provide 445,000 h.p. hydroelectric development in the Prairie Provinces, there are indications of expansion in industrial activity for 1930 and 1931.

Buyer—Give me a radio tube and a pick-axe.

Seller—Why, we don't carry those things.

Buyer—Some drug store, I'll say.

"The plot thickens," said the old lady as she sowed the grass seed for the third time.

Reproduce Hotel in Sugar

A large model in sugar of the great Canadian Pacific Hotel at Toronto, the Royal York, forty-two inches in height, has been made by Harry Astley, chief confectioner of the liner "Empress of Scotland." The model was exhibited at the Confectioners Exhibition, London, England, this month.

Soil Of Canada Has Played A Large Part In Giving U. S. Some Of Its Greatest Citizens

Closely Related To Marquis

In Two Years Reward Wheat Captured World's Championship

Reward wheat, a hard red spring variety with which Joseph H. B. Smith, of Wolf Creek, Alberta, won the world's wheat championship at the 1929 International Grain and Hay Show, Chicago, is closely related to the famous Marquis wheat. It was developed from a cross between Marquis and Prelude, in 1912, at the Canadian Government Central Experimental Farm in Ottawa, with the hope of developing a variety that would combine the early ripening habit of Prelude with the greater productiveness and better straw of Marquis. The cross resulted in several exceedingly interesting and promising combinations, one of which received the name of Reward. This new variety, as it now exists, matures in less than one hundred days from the time of planting, or about fourteen days earlier than Marquis takes to mature. Reward produces an excellent quality of flour and a very fine appearing kernel. The straw is of medium length and excellent strength. It was first released to farmers in western Canada and elsewhere in commercial qualities in 1928, and within two years had captured the world's championship.

Educational Films

United States Government Loans Motion Picture Films To Canada

Through the courtesy of the United States Government Bureau of Mines, the Canadian Department of Mines, Ottawa, has received the following motion picture films for free circulation throughout Canada:

"The Story of Sulphur" (2 reels).
 "The Story of Rock Drilling" (2 reels).
 "The Story of Steel" (6 reels).
 "The Story of Gasoline" (3 reels).
 "Heat Treatment of Steel" (2 reels).
 "Through Oil Lands of Europe and Africa" (2 reels).
 "The Story of Dynamite" (2 reels).
 "Carbon Monoxide: the Unseen Danger" (1 reel).

These films are all on standard (35 mm.) stock, and are all non-inflammable except "The Story of Rock Drilling."

No charge is made for the rental of the films, but the borrower is expected to pay express charges. Application for the loan of any of these films should be addressed to The Director, Geological Survey, Department of Mines, Ottawa, Canada.

Northward into the Canadian West there is a steadily increasing migration of men and women from the United States. Continued long enough this may make up for the loss of population during the past century of Canadian citizens to the great republic.

It may not be so stated in United States school books, but the soil of Canada has played a part directly or indirectly in furnishing the United States with some of its greatest citizens.

In a little churchyard in Norwich, Oxford County, Ontario, rest some of the maternal ancestors of President Herbert Hoover. In the early days they fled from the rocky fields of a Pennsylvania farm to take up land in Canada. Near Norwich, on soil that was not the best, they struggled on for many a year. Then the news of free land in Iowa caused Hoover's grandparents to yoke up the oxen and head west. Toil and poverty were the lot of these fine Quaker people. Is it any wonder that President Hoover now receives with sympathy the pleadings for assistance of the farmers of the United States?

President Hoover's people left Oxford County for Iowa about the time that Thomas A. Edison got a job as telegraph operator 20 or 30 miles north of Norwich at Stratford, in the County of Perth. It is 50 years since Edison invented the incandescent lamp and it is said that he neglected his routine work in the railway station at Stratford to carry on his experiments in electricity.

In the seventies a boy ran away from Victoria, British Columbia, with a circus. His father, a Jew, who had met disaster in the Cariboo goldfields, mourned for David Belasco for many a day. Then David, who was supposed to be dead, turned up very much alive. He lived to become probably the greatest producer in the history of the American stage.

These are but three examples of famous citizens of the United States who have often referred to the influence upon their lives or the lives of their parents of the free and invigorating air of the Dominion of Canada. A complete list would include probably scores of names, among them such notable figures as the late James J. Hill, builder of the Great Northern Railway, native of Guelph, Ontario; the late Franklin K. Lane, minister in Woodrow Wilson's cabinet, from the Maritimes; and Captain Robert Dollar, shipping magnate, of Scottish origin, but for many years a logger in the Ottawa Valley—Vancouver Province.

Encouraging Sheep Industries

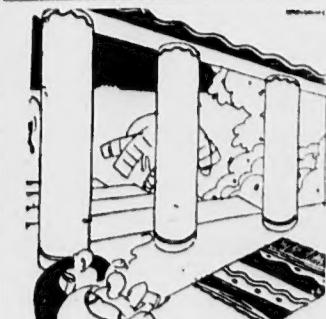

Manitoba Department Of Agriculture Distributing Breeding Stock To Beginners

Reports from the livestock branch, Manitoba Department of Agriculture, show approximately 140 head of rams distributed to breeders, mostly beginners, who received ewes from the Manitoba Livestock Credit Company, from recent importations. Of this number about 70 are Shropshires, 52 Oxfords, 12 Suffolks, and six Hampshires.

Rate Editor (to cub who seeks advice at inconvenient moments): "What are you doing now?"

Cub: "Just odd jobs, sir."

Rate Editor: "Splendid. Make a bolt for the door, will you?"

"I will meet you Wednesday, of next week."

"I have to go to America next Wednesday."

"Then shall we say Thursday?" — Gutierrez, Madrid.

Lady: "Aren't you the man I gave a glass of port to the other day?"

Tramp: "Yes, and now I have come to see if you could sell me a bottle." — En Rolig Half Timma, Gothenborg.

SEED CLEANING

The seed cleaning machines for the province are at last on definite basis. The federal and provincial government will share cost of the part purchase of six cleaning machines costing \$1700 each. Both governments will contribute \$350 each on a machine, while the additional \$1,000 will be supplied by the organizations wishing to buy the machines.

The travelling seed machines will be built in Edmonton, a nominal charge for cleaning will be asked. Any organization taking over a machine must agree that enough seed to supply the immediate needs of the farmers must be cleaned, before any surplus stock is cleaned.

The need for any very large central cleaning plant does not seem great. One costing \$40,000 would easily meet all demands upon it.

NEW WHEAT PROBLEM

From various sources comes the warning to the wheat growers of Canada, that in the next few years there is likely to be vast wheat competition in the world market, with the likelihood of lower wheat prices.

In many countries, more territory is constantly being re-claimed for wheat growing. The Argentine is a formidable competitor. The Panhandle of Texas is growing great crops. Soviet Russia is planning million-acre blocks of land for farming and is ordering vast supplies of modern wheat machinery.

In the face of this probability, wheat farmers are urged to consider as never before acre production and acre costs. He must bolster up his soil fertility, watch crop rotation, produce the maximum at a minimum of cost. He must turn to the possibilities of mixed farming, and the best use to which he can put his land.

RED CROSS AT THE U. F. A. CONVENTION

The Red Cross Nursery at the U. F. A. Convention has become an established part of the busy conference of country people who meet annually on their business of U. F. A. For several years now the service of caring for the little children of the delegates has been undertaken by the Red Cross, who supply a nurse and comfortable cots and other nursery equipment for the use of the small travellers. With perfect confidence that her baby will be in good hands, the mother leaves him in the morning asleep in bed, while the runabouts are at play, or interested with books and writing material. She is able then to take in the lectures and addresses, and make

LOCAL & GENERAL

Hockey to-night. John Deere Aces at Didsbury. 8 o'clock sharp.

Don't forget that Monday, Feb. 17th, is election day.

Mr. Bill McFarquhar spent the week end at his home in Calgary.

Mr. Rollie Hollinger, an old timer, was a visitor in town on Tuesday.

The Calgary spring live stock show will be held from March 3rd to April 5. The prize lists are now available at the office in Calgary.

Russell Berscht, who received an injured ankle at the hockey game Friday night, is able to use his foot again with the aid of a cane.

Melvin Go-Getters are holding a dance in the Melvin School on Friday evening, Feb. 28th. Good snappy music.

Miss Symons, of Calgary, wishes to announce that she has opened a beauty parlor in the Peterson Block. Marcelling and water waving are specialties. 74p

About seventy-five hockey fans witnessed the game between Olds and Red Deer at Olds on Friday night. Red Deer won 4-3 in a very exciting game.

The Baron and Baroness de Villenfagne de Leon, of Red Deer, were guests of Mrs. Harmer at the hotel last week. The baroness was formerly Miss Laurence Legault, of Didsbury.

The Leisemr rink returned from Carstairs bonspiel with a first prize, defeating Gilchrist, of Crossfield in the finals of the Distributor's competition. Personnel of the rink: H. C. Leisemr, Lee, Bill McCoy and Walter McCoy.

A meeting of dairymen is being advertised to be held at the Crystal Dairy, on Saturday, Feb. 22nd. Mr. A. G. Moore, of the Dept. of Agriculture cow testing branch, will be in attendance and an effort will be made to form a cow testing association.

NOTICE.

The Alberta Co-operative Live Stock Producer's Association wish to notify all old contract signers of the Livestock Pool that they have the privilege of shipping their livestock through this association and also all farmers wishing to cooperate with the pool have the same privilege until further notice.

The shipper engaged is Mr. Bob Simpson, who will be at your service at all times. Phone 41. Committee.

her notes for the reports that she must present to the local of which she is a delegate. None but a busy mother can appreciate what it means to have the children "taken off her hands for a spell." Hence the feeling of friendship for Red Cross is strengthened for those delegates whose little people have been guests in the Red Cross Nursery for the Convention week.

Downstairs by the busy entrance of the U. F. A. hall may be found the Health Literature table and Poster display of the present day activities, in charge of the Radio Lady. This little booth is always surrounded by visitors and friends, many of whom are ardent Red Cross workers in their own locals. Most of the women have already linked themselves with Headquarters by their handwork of sewing or knitted comforts which they have sent to the relief department, with the information that the garments and quilts were made by a group of listeners on Tuesday afternoons at the Red Cross Friendly Hour of C. J. C. A.

Greetings from Red Cross are presented on the program and a warmth of feeling is experienced by the speaker, as the audience assures her of their faith in the future of Red Cross as a factor for health and happiness in the life of every little child in Alberta, whether sick or well.

Notice is hereby given that a meeting of the electors of the Municipal District of Mountain View No. 310, will be held at the Agricultural School, Olds, Alta., at one o'clock, p.m., on Saturday, Feb. 15th, 1930, for the discussion of the affairs of the district; and that from three o'clock p.m. to 4 o'clock p.m. on the same day and at the same place, nominations for the office of councillor will be received. Councillors are to be elected for Divisions Nos. 4, 5 and 6.

Given under my hand at Didsbury, this 4th day of February, 1930.

HUGH McLEAN,

Returning Officer.

Municipal District of Westerdale**No. 311**

Municipal Elections, 1930.

Public Notice is hereby given that a meeting of the electors of the Municipal District of Westerdale No. 311, will be held at the Westerdale Community Hall, at one o'clock p.m. on Saturday, the 15th day of February, 1930, for the discussion of the affairs of the district; and that from 3 o'clock p.m. to 4 o'clock p.m. on the same day at the same place, nominations for the office of councillor will be received.

Councillors are to be elected for the following electoral divisions: No. 1, 2, and 3.

Given under my hand at Didsbury, this 4th day of February, 1930.

G. A. YOUNGS,

Returning Officer.

NOTICE.

Town of Didsbury Municipal Election and Didsbury School District No. 652. Election.

Public notice is hereby given that an election will be held for the office of Councillors and School Trustees of the Town of Didsbury and of the Didsbury School District No. 652, respectively, will take place on Monday, the 17th day of February, 1930, from ten o'clock in the forenoon until seven o'clock in the afternoon, at the office of the Secretary-Treasurer, Didsbury, and that I will be at my office on Tuesday the 18th day of February, 1930, at eleven o'clock in the forenoon, to sum up the votes and declare the results of the election.

Given under my hand, at Didsbury, this 10th day of February, 1930.

W. A. AUSTIN, Returning Officer.

The stage is being rapidly set for one of the outstanding developments in Canada in a decade when the English Folk Dancers and exponents of English folk dancing will hold a festival at the Royal York Hotel, Toronto, November 13-18. A British opera by a British composer of world-wide fame will be produced for the first time on this continent when "Hugh the Drover," by Dr. R. Vaughan Williams, is put on during the festival, and Canada and Canadians will be introduced to a whole new world of art and beauty.

We are all primarily conscious of the fact that this country, measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbed stock markets and a rather unusual grain situation, both of which are, we hope, temporary," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner given recently in his honor by the St. Catharines Chamber of Commerce.

Robert Hume and George Thornton, veterans of many competitions, who teamed up from Manor, Saskatchewan, in the Canadian Pacific Swine Club competition for boys and girls of the province, have carried off the silver trophy and will join the teams from the western provinces for a trip to the Royal Winter Fair at Toronto as guests of the railway.

Bituminous sand deposits of the McMurray district and along the Athabasca River will eventually furnish the large quantities of material required for waterproofing and surfacing the gravel roads of the western provinces, is the opinion of Major C. G. Ommenay, director of development for the Canadian Pacific Railway, Montreal.

THEATRE BLDG. PROGRAM FOR 1930 TO REACH TOWNS

Construction and renovation of theatres will form a large part of the building contracts in 1930 throughout Canada. Due to the popularity of the color and talking pictures towns and larger villages will build new theatres and completely renovate old buildings to accommodate the new equipment.

It will mean a huge outlay of money. One circuit, which has 120 theatres throughout Canada wired for second pictures, has already had an outlay of approximately \$2,000,000. In the city of Ottawa this circuit spent \$27,000 on one theatre alone, \$17,000 for equipment and \$10,000 for alterations.

The smaller theatres will mean a large outlay of money for the wiring and equipment. It is estimated that sound and color pictures with the best the small theatre may be fitted for equipment for \$9,000. But the trouble of the theatre manager does not end there. He not only pays three times as much for a sound pictures as he did for a silent one, but he also has to employ two operators. The union scale has advanced, too. Before the advent of the sound picture the scale of wages was \$33 a week and now two operators have to be employed the scale has advanced \$10 a week and the wage thus is \$86.

But in spite of these difficulties the towns of Canada are making arrangements to install the "talkies". Although there are still a number of theatres showing silent pictures, there is a growing demand for talkies and colored pictures both in the cities, towns and villages. It is expected that theatre construction and reconstruction for the year 1930 will be increased 200 per cent.

GERMANY INCREASES DUTY AGAINST CANADIAN WHEAT

Information released by the Dept. of Trade and Commerce, Ottawa, shows that, effective January 21st last, Germany has again increased her duties against Canadian wheat and flour, and the new rate is slightly in excess of 60 cents per bushel of 60 pounds. This is in line with the general German policy since 1922, when wheat was allowed to enter free of duty.

Some time later a duty of 32.4 cents per bushel was levied, and in July, 1929, the duty was increased to 48.5 cents per bushel. While the new duty against Canadian wheat is now a little more than 60 cents a bushel, that levied against the United States and other countries enjoying trade treaties with Germany is 42 cents per bushel.

About 2,800,000 fry and 240,000 eyed eggs, a total of 3,049,000 prospective fish, was the record output of the Banff hatchery this past season. The eggs were conveyed with difficulty by pack horse to the Bear Creek Valley watershed of Lake Louise. The fry were widely distributed over western areas.

Statistics show an increase of 1,036 vessel arrivals in the Port of Vancouver for the first nine months of this year above the number for the same period last year. Net tonnage shows an increase of 251,648 tons inward while outward tonnage shows a corresponding increase. Gain in arrivals was made up by 22 more deep-sea vessels; 22 foreign coastwise; and 992 more local coastwise.

Editors representing the leading farm papers of the United States will tour Eastern Canada by special train next summer as result of a joint invitation extended to the American Agricultural Editors' Association at their annual convention recently held at Chicago, by representatives of the Canadian Government and the Canadian Railways. The tour of Canada will last fifteen days and will afford the visiting editors an opportunity to study the agricultural and industrial development of the provinces of Ontario, Quebec, New Brunswick, Prince Edward Island and Nova Scotia.

Herbs that Heal when Bronchial Tubes Seem all on Fire

Fifty years ago, a quiet-going soul, James Gallagher, came to Peterborough County. His was a marvelous skill in compounding herbal medicine. One of his many prescriptions—for folk subject to Bronchitis or similar ills and nasty coughs and colds—was his Indian Herbal Remedy, full of the health-giving power drawn from Mother Nature, herself. Wonderful healing to inflamed tissues. •A builder of good, red blood. Make the acquaintance of this tried, reliable remedy. Keep well this Winter. Together with the other fine Gallagher Herbal Household Remedies, now obtainable from

H. W. Chambers, Didsbury

Why Punish Your Furnace?

WHEN you have to run your furnace at full blast all winter you are losing money two ways.

First, you are cutting down the life of your heating plant.

Second, you are burning more fuel than is necessary and thereby paying high coal bills.

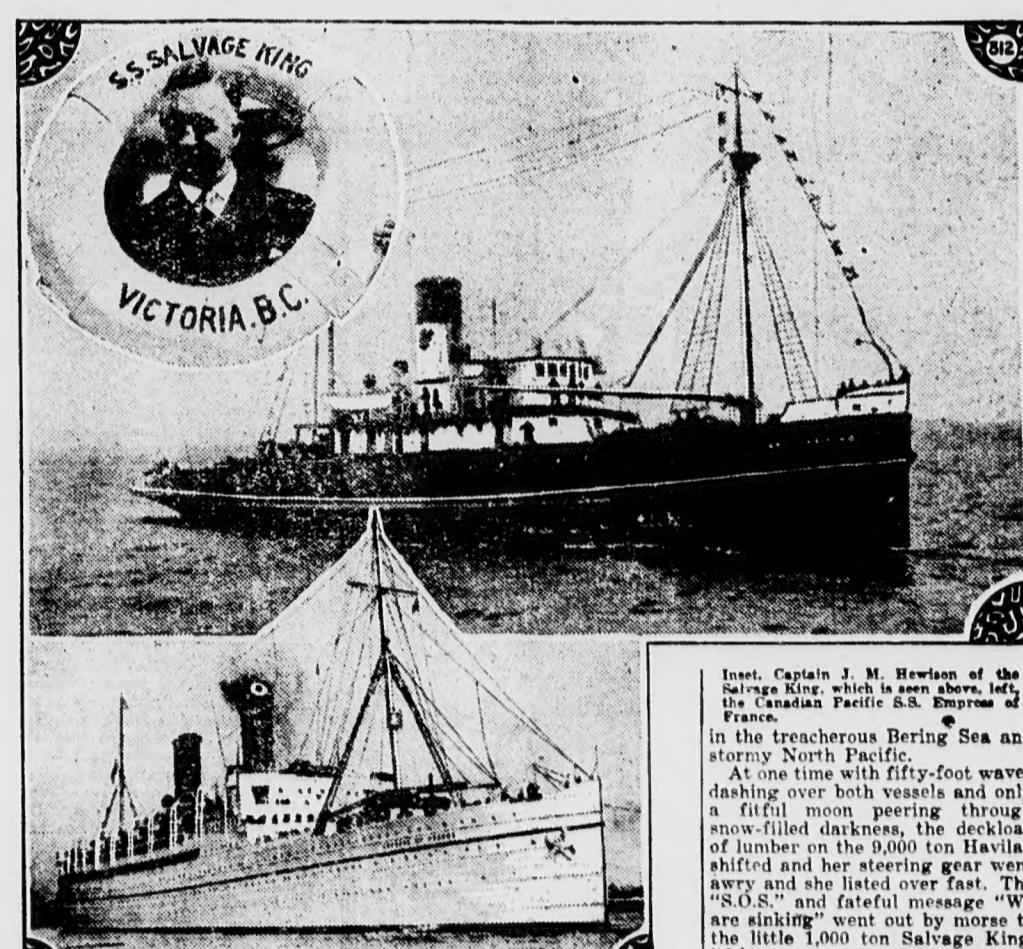

DRY INSULEX placed between attic floor joists prevents excessive heat loss, thereby reducing the strain on your heating plant and saving fuel. Vermin and fire-proof, packed in convenient sized bags—you can apply it yourself, easily, quickly—made from Gypsum, it forms the ideal insulation.

See us to-day.

DRAMA OF SEA SALVAGE

Inset. Captain J. M. Hewison of the Salvage King, which is seen above, left, the Canadian Pacific S.S. Empress of France.

In the treacherous Bering Sea and stormy North Pacific.

At one time with fifty-foot waves dashing over both vessels and only a fitful moon peering through snow-filled darkness, the deckload of lumber on the 9,000 ton Havilah shifted and her steering gear went awry and she listed over fast. The "S.O.S." and fateful message "We are sinking" went out by Morse to the little 1,000 ton Salvage King, lifeboats were swung out, and men stood by ready to sever the steel tow line with an acetylene torch. The freighter survived the storm, however, and was towed through gales and mountainous seas for nine more days to Osaka, Japan, covering 3,100 miles in 25 days. When she met the Empress of France, on which the captain and crew of the freighter were passengers, she was completing a voyage of 10,000 miles after having performed a task that no other salvage vessel on the Pacific had been able to undertake.

WHEN the Canadian Pacific liner Empress of France and the Pacific Salvage Company's big steam tug Salvage King rubbed sides near the entrance to Victoria Harbour recently greetings were exchanged between two principal actors in an outstanding drama of Canadian seamanship. They were Captain Bunker, former master of the freighter Havilah, and Captain

J. M. Hewison, master of the Salvage King, the former being a passenger on the giant passenger liner.

The tug after sixty days out of her own port was returning after performing the heroic feat of towing the disabled freighter Havilah from Dutch Harbour, Alaska, to Osaka, Japan, through days of constant gales, terrific seas and under almost every kind of marine handicap, a distance of 3,100 miles

WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

The New Zealand Government has invoked force of arms to enforce its authority over British Samoa, and end the long resistance of Samoan natives to its government.

Immigration to Canada in the first eight months of the current fiscal year—from April 1 to November 30, 1929—totaled 136,440, a decrease of 2,158 when compared with the corresponding period of 1928.

Four crusaders in the cause of greater markets for British Columbia lumber have left for the Antipodes for a four months' sojourn in Australia and New Zealand, studying the requirements of those countries.

Cannibalism is practically unchecked in the famine-swept provinces of China. George Andrews, a missionary from Kansu province, told British and United States missionaries in an address at Shanghai, picturing scenes of almost unbelievable horror and death.

The past year has been one of marked progress for the Alberta Wheat Pool, according to an official report, which shows an increase in membership during the year of 5,819. Total membership at October 31st, 1929, was 40,915 with 4,625,309 acres under contract.

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Why Dutch Are Sturdy

Start Day With Breakfast Of Many Courses

A Dutch breakfast is like no other meal in the world. There are, to start with, at least seven kinds of bread, plain white bread, ginger bread, plain buns, buns with raisins, brown bread, toasted biscuits, sweet cakes and a kind of fruit cake. You will find at least three or four kinds of meat, cold sliced veal, roast beef, ham and sausages.

Then, if you don't see it all at once, you smell the cheese, two or three of the Dutch specialties, including Limburger and Edam. There are several dishes piled with boiled eggs, and, of course, there are jams and honey and seasonable fruits. The climax is a pot of steaming coffee, not the insipid beverage of the rest of Europe, but the real thing from the Dutch colonies.

Ask Reduction Of Income Tax

Canadian Chamber Of Commerce Submits Some Important Questions To Federal Cabinet

The views of the Canadian Chamber of Commerce on a number of important national questions were submitted to Prime Minister Mackenzie King and members of the Dominion Cabinet, at Ottawa, recently.

Headed by Col. J. H. Woods, of Calgary, president of the chamber, a deputation waited upon the prime minister and his colleagues and presented a memorandum based on resolutions passed and subjects discussed at the Calgary meeting of the chamber last summer.

Such important matters as the construction of the St. Lawrence waterways; reduction of the income and sales taxes; seasonal unemployment; development of the Peace River country; construction of a national highway; inquiry into complaints of the fruit and vegetable industries; development of Empire trade, etc., were touched upon in the memorandum submitted.

In connection with the suggestion of the deputation for the further reduction of the income and sales taxes as when warranted by the Dominion's finances, and the avoidance of duplicatory taxation, Hon. C. A. Dunning, Minister of Finance, made a few comments. He pointed out that the federal income tax was a war measure, and that the Dominion still required money to pay war obligations.

Suggestions had been made by some of the provinces that the Dominion abandon the income tax. But, said Mr. Dunning, the Dominion could not do without this tax. Another suggestion had been made by certain provinces, however. That was that the field be divided between the Dominion and Provinces. The Dominion, for instance, might retain business income taxation and leave personal income taxation to the provinces. Without making any promises, Mr. Dunning asked the deputation to think over the situation with these suggestions in mind.

Recipes For This Week

(By Betty Barclay)

ORANGE BREAD PUDDING

1 cup bread crumbs.
2 tablespoons butter.
2 cups scalded milk.
2 egg yolks.
1/2 cup sugar.
Juice 2 oranges.
Grated rind 2 oranges.

Soak bread, crumbs, butter, and scalded milk thirty minutes; then add egg yolks, beaten with sugar, and orange juice and rind. Pour into a buttered pudding-dish and bake in a moderate oven until firm. Cover with meringue.

GRAPEFRUIT MARMALADE

1 orange.
1 lemon.
1 grapefruit.
Water.
Sugar.

Slice fruit very thinly, rejecting only seeds and core of the grapefruit. Measure fruit, and add to it three times the quantity of water. Let it stand in an earthen dish over night, and, next morning, boil for ten minutes only. Leave until next day, then boil two hours. Measure, add an equal amount of sugar, and boil, stirring occasionally, that it may not burn, about an hour, or until it sheets from spoon. Pour into sterile glasses; let stand covered with cheesecloth, until firm, then cover with melted paraffin.

B.C. Pilchard Industry

Now One Of the Most Important Branches Of Province's Fisheries

Starting with the very small beginning of one plant and a catch of 500 tons in 1925, the pilchard industry of British Columbia has assumed very large proportions and during the present year there were 23 plants in operation handling a total catch of 80,000 tons, making the industry one of the most important branches of B.C. fisheries. The product of the pilchard oil and meal this season is valued at \$1,750,000, most of the oil going to the United States where it is used largely in the soap industry, while the meal is shipped to Germany, Japan and the United States.

Minard's for the Ideal Rubdown.

Predicts League

Will Encircle World

General Smuts Says All Nations Will Eventually Join

In not more than ten years the whole human race including Russia will be represented at the council table of the League of Nations. This was the prediction of General Jan Christian Smuts, South African statesman, speaking at a dinner in New York, arranged as a part of the celebrations in the U.S. for the tenth anniversary of the founding of the league.

"It would be a very serious and a very tragic thing," said General Smuts, "if when all the nations of the world gather there, the seat of the founder and inspirer should remain vacant."

In this and other references he paid tribute to the late President Wilson as one of the main forces in bringing the league into existence. The United States, he pointed out, was bound to enter into international conferences whether within or without the league. The pact of Paris required. In this way the method of conference for disposing of international disputes would become universal and once this came about peace would be guaranteed without fail.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

One Jump Ahead

Cubist artist: "You see, we moderns strive for the purgation of the superfluous, which throws the accent on the inner urge. Do you follow me?"

Visitor: "No, I'm ahead of you. I came out of the asylum last week!"

Accidents in London streets are responsible for four people killed and 176 injured every day.

Canada As Health Resort

Many People Come From Other Lands Winter and Summer

"Come to Canada for your health" may sound a mirthless irony when one thinks of the annual trek of the so-called fortunates to the sun shelter of the south. Yet year in and year out, summer and winter, there are many coming to Canada for health. They come for the crisp, dry air, the healing vapor of the pines. They come for the clear nights and the sweet scent of the morning breeze of Canada, for no country has better.

Not many years ago a young doctor had just finished a grueling course at a noted English university. He wanted to take post-graduate work on the continent, but he found his studies had already undermined his health. He was threatened with tuberculosis. A friend advised Canada, so out he came, armed with hope and two cases of a health emulsion, and determined to stay two years. He stayed near Prince Albert for the two years and went back a cured man to render Trojan service in a moorland district of the old land and to serve in the Medical Corps in the great war.

Tribute To Rising Generation

President Of University Of Alberta, Addresses Gathering At Ottawa

Paying tribute to the rising generation of Canadians for their intense practical-mindedness, Dr. R. C. Wallace, president of the University of Alberta, sounded a warning in his address before the University Club of Ottawa, that more attention be paid in educational matters looking toward the arts, literature, music and the pure sciences.

"While the practical-minded interest of the rising generation will be a tremendous asset in the coming generation, we must not be unmindful of those other higher things of life," he said.

"How did you find the weather while you were away?"

"Just went outside and there it was."

There is some uncertainty as to the position taken by sleeping elephants, but it is believed that they sleep lying down.

Some men can find happiness only by fishing for it.

"Was Skinny and Tired. Now Happy. Gained 11 lbs."

Wilder Silver Medal

W. T. Macoun, Dominion Horticulturist, Is Rewarded For Good Work Accomplished

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in the breeding of new varieties of apples and in the interests of horticulture generally. The award was announced at the meeting of the American Pomological Society, held recently at Roanoke, Virginia.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Eastern newspapers have revived the controversy over the shortest poem in the English language. Years ago the New York Sun gave the prize to this one, entitled "Fleas."

Adam
Had 'em.

The London Sunday Express notes that Scotsmen are now using boxes of cigars they received last Christmas from Scotsmen who received them the previous Christmas.

Getting Bald?

You needn't! Minard's checks falling hair and stimulates new growth—adds new life to the entire scalp.
Rub into scalp four times a week.

WINDOLITE

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 120 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros.

Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrel, a loyal little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Perry, taking her baby, Junior, as she sails for France. Al, broken by the loss of his son, becomes a derelict, but is saved by Grace Farrel, and recovers to appear in a Broadway revue. One night he receives a phone call from Molly and rushes to a hospital to find Junior fatally ill. He sings to Junior, but his son dies. Then Al dashes back to the theatre to find he must sing the same song to his audience.

CHAPTER XXXI.

The bright lights were on, the stage was empty, the orchestra played the opening bars that heralded Al's entrance. But still he stood in the wings as if in a trance, fearful of attempting the song he had just sung to his dying child. The orchestra stopped, started again, and the stage manager ran toward Al.

"That's your number, big boy."

"I can't sing that song," protested Al. "Not tonight."

The stage manager saw something was wrong, but he didn't know what.

"It's too late to change, now, Al. It's your hit song. Think of the show!"

The show! Al walked on the stage, driven by sheer force of will. There were the lights, there was the orchestra leader, beyond were the dim sea of faces of the audience. Without

**Weak After Operation**

"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."—Mrs. Wm. H. Bechteller, Box 143, Port Colborne, Ontario.

**Lydia E. Pinkham's
Vegetable Compound**

E. & F. D. C. CO., LTD., LONDON, ENGLAND

W. N. U. 1821

knowing it, he fell into his character, the happy-go-lucky singing fool. A roar of applause came up and met him like a great wind. He went into his song, believing he could carry on. The stage manager relaxed and turned to Grace. "What's the matter with him?"

Quickly Grace explained and they both watched Al with anxious eyes. Would he make it? He was singing bravely, but it was apparent to their well trained ears that he was faltering now and then. When he came to the chorus the quaver in his voice was too intense. Once his voice broke entirely.

Suddenly it seemed to Al as if that sophisticated audience didn't exist. Instead of grown-up faces he saw hundreds of faces of babies and children, pleading and beckoning to him. Babies and children, who had drifted off into Never-Never Land, and among them Junior! Junior's face and figure came toward him with arms outstretched.

Only Grace understood the dreadful ordeal he was passing through. She felt as if he were sinking into that sea of light while she stood by, unable to aid him.

To the audience it seemed as if the intense fervor of Al's singing, keyed close to the breaking point, was only a phase of his skilful rendering, but the musicians caught the occasional minor breaks and glanced up with worried expressions.

Then the end came—Al simply broke off singing in the midst of his song. He stood there, seeing Junior as plainly as he had seen him at the hospital. . . . Where was he? Oh, yes, the theatre, the lights. He tried to rally, choked, and stopped again. Swiftly the stage manager signalled to have the curtain lowered.

As the curtain came down Grace ran forward and caught Al in her arms. The stage manager was by her side to put an arm about his star singer and help him toward his dressing room. From beyond the curtain came the staccato beat of the applause. The audience was bewildered, but it realized that the best tribute it could give was due the man who had just stood before it.

Al collapsed in his dressing room chair, his head dropping limply forward on his chest. What had happened? . . . Oh yes, he remembered—he had tried to sing and failed. He raised his head, gazed around the room curiously and brought his eyes back to Grace's face. Here was dear, loyal Gracie standing before him—what was a help, at any rate.

"I guess I flopped, darling."

Grace did not answer. She simply took his face in her hands, holding it firmly and gently, as if to soothe the trembling muscles. How curiously large and brilliant his dark brown eyes seemed with the solid black make-up around them.

As Grace tried to quiet him Al saw Junior's photograph and heard the ticking of his watch, which seemed strangely loud. It was like a voice telling him that time was passing and that his baby had gone away.

He picked up the watch and began slowly turning the hands backward—to nine o'clock, to eight, seven and six. Then he stopped, while an uncanny expression, almost like a smile, crossed his face. Grace drew back with a terrible rising fear that he might be losing his mind.

"What is it, darling? Why are you doing that?"

"I'm doing it because of Junior."

His voice and eyes were rational now and she saw a tear splash across the watch case.

"I'm turning my watch back," he said softly, "to the time when he was still alive!"

No one but Al and Grace knew the fierce struggle that little Grace passed through after Junior's death to save the man she loved.

It seemed as if the menace of his first breakdown lurked, like an ogre, just around the corner, waiting to pounce out and send him down and out. Its chance came with the passing of the little boy Al had loved with his whole heart. So the ogre of despair was at Al again, while Grace fought valiantly.

She watched Al like a hawk, fearful that he would disappear once more. She knew if he did she would never be able to bring him back. The second breakdown would be much worse than the first.

On the day after his breakdown Al's old sense of apathy took possession of him; he told Grace he would have to quit the show. But at this declaration Grace took

**Tribute For Newspaper Editor**

One Of Greatest Newspaper Editors Of Great Britain To Be Honored By City Of Manchester

C. P. Scott, chief proprietor of the Manchester Guardian, and until his resignation a few months ago one of the greatest newspaper editors in Great Britain, will be honoured by the city of Manchester when the freedom of the city is conferred upon him shortly.

"C. P." resigned the editorship of the Guardian, which he had developed into one of the most influential organs in the country, in July of last year. The task devolved upon his son, Edward Taylor Scott.

On that occasion "C.P." received from His Majesty a telegram congratulating him upon his editorship of the Guardian for 57 years, an achievement which His Majesty remarked "was surely unique in the history of journalism."

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta's Gas Tax

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,750,000 between April 1st and November 20th, provincial officials state. At least \$50,000 more is expected to be taken by March 31st, 1930, the end of the fiscal year.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Speaking For Himself

"Call these prize cattle? Why, they ain't nothing to what our folks raise. My father raised the biggest calf of any man around our parts."

"Don't doubt it," remarked a bystander, "and the noisiest."

India has a population of 320,000,000, practicing nine great religions, speaking 130 different dialects, belonging to six distinct families of speech.

TOO MANY GIRLS—

dread wintery weather for the torture it brings from sore faces, chapped hands, frostbite and cold-sores.

With the face, hands and arms protected by Zam-Buk, frost and cold winds simply cannot redden, roughen and chafe your skin. Wash with Zam-Buk Medicinal Soap and apply the Zam-Buk balm after drying.

There is nothing like this Zam-Buk treatment for keeping the skin smooth, strong and flexible. Composed exclusively of rich herbal essences, Zam-Buk soothes and purifies the tissues and prevents all roughness and soreness.

Where the skin has already become chapped, blistered and sore, Zam-Buk, because of its great antiseptic and healing power is doubly valuable. It takes away the smarting irritation almost immediately, kills dangerous disease germs and quickly heals with new healthy skin.

Zam-Buk is the best remedy obtainable for chapped, cracked hands, cold-sores, frostbite, chilblains, winter eczema, burns, scalds, and all wounds and injuries. 50c. box, all chemists.

Little Helps For This Week

"The love of Christ constraineth us."—2 Corinthians v. 14.

Blest be Thy love, dear Lord.
That taught us this sweet way:
Only to love Thee for Thyself,
And for that love obey.

—John Austen.

"The love of Christ constraineth me." It is in the light of these words that we come to understand the meaning of the cross of Christ. If love is to be the king of your life and mine, if with us here, amid all the strife and rivalry that make up our "workaday world," the voice that bids us love is to be regnant over all other voices, somewhere or other there must be the spell that compels us to do so. An apostle has found the spell when he wrote, "the love of Christ constraineth me;" and other men than he, aye, a multitude whom no man can number, have looked also into the face crowned with thorns, and have learned there how to love.—Henry C. Potter.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

"Dear Lord," prayed the co-ed, "I don't ask anything for myself — just give mother a son-in-law."

**Needless Pain!**

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgic, neuritic, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Aspirin for immediate relief.

Burnside Notes

Miss Dorothy Cipperley is spending a months vacation at her home here. Miss Winnie Spragg has taken her place at the hospital.

Mr. Wesley Woollner who spent some time visiting friends and acquaintances in the district, left on Monday for his home in Waterloo, Ontario.

Burnside school has a very snap-py hockey team and they are going down to play Sunnyslope on Saturday next.

Scotty Davison has gone to the bush to take out lumber for Con Liesemer.

Burnside U. F. A. met on Monday night in the Lone Pine hall. Mr. Hugh McLean who was a delegate to the recent annual U. F. A. convention at Calgary, gave a splendid report. This was followed by a debate, "Resolved that woman is man's equal", with E. R. Dawson for the negative and A. A. Jenkins for the affirmative. After a spirited argument. The judges decided in favor of the negative.

The Burnside U. F. A. are putting on a dance in the Lone Pine hall on Friday evening, Feb. 21st.

RUGBY NOTES

The February meeting of the Rugby W. I. was held at the home of Mrs. C. Brown, with an attendance of 13 members. After the business of the afternoon was disposed of, Mrs. J. Hughes took up current events. This was followed by a most entertaining paper on Nellie McClung given by Mrs. Whiteside and enjoyed by all present. A very clear and concise account of the work of the League of Nations written by Mrs. Brubaker was also read at the meeting. We closed our afternoon with singing the National Anthem and lunch was then served. The March meeting will be held at the home of Mrs. Whitesides.

WESTCOTT W.I.

The Westcott W. I. met at the home of Mrs. Harvey Sticky on Thursday last. There was a good attendance in spite of the cold day. The topic for the day, "Home Economics" was taken by Mrs. Blanche and who very capably demonstrated the making of ornamental flowers. This Institute is holding a social evening for the members and their families at the home of Mrs. J. Hughes on Feb. 7.

The next meeting will be held at the home of Mrs. J. Robertson on Feb. 27th.
